

Brian P. English, born in Munich, Germany, received his B.A. from Cornell University in 2001, and his Ph.D. in Chemistry and Chemical Biology from Harvard University in 2007. His graduate research with X. Sunney Xie was focused on single-molecule enzymology. In 2012, he joined the Transcription Imaging Consortium at the Janelia Research Campus in Virginia. His aim as a Janelia Senior Scientist is to develop quantitative single cell and single molecule assays to study when and where enzymes are interacting inside living cells.

NOV 13
11AM - 12PM
ND11.218

Lunch with speaker to
follow in ND11 atrium

“Multiplexed single-molecule live-cell imaging reveals the dynamic nature of complex biological reactions”

Brian P. English, PhD · Janelia Research Campus

COMPUTATIONAL AND SYSTEMS BIOLOGY SEMINAR SERIES
